ABOUT ARFIT

In 1945, in the heart of the city of Porto, a company was founded that reflected the values we are still proud to uphold today: integrity, commitment, and excellence!

Established on January 9, 2008, ARFIT quickly earned an important position in the HVAC sector, offering integrated and efficient solutions that adapt to any project.

Today, the company has more than 100 employees who work every day to ensure the continuous improvement of its services, products, and developed projects – always with the main goal of delivering the highest quality to the market.

Within its wide product portfolio, exported to more than 20 countries, the PURE H and PURE P units stand out, both complying with the relevant regulations and certified by EUROVENT and TÜV Nord (PureH).

Our goal is your comfort!

Quality is one of our pillars of success

At ARFIT, quality is ensured in every detail: all components undergo rigorous tests for strength, airtightness, corrosion resistance, assembly, and performance – ensuring a final result that is both reliable and long-lasting.

THE IDEAL SOLUTIONS: PURE-H AND PURE-P

Combining technological innovation with strict hygienic standards, the PURE range was developed to meet the most demanding requirements. Available in PURE-H and PURE-P versions, it offers flexibility and reliability for any project.

Features:

- > Eurovent Certification | Hygienic Certification
(According to VDI 6022-1 and DIN 1946-4 standards - Pure-H)
- > Be On with direct cloud connection and BeSmart monitoring
- > Unit adaptable to the available space
- > C5 corrosion class
- > Flexibility and versatility
- > Plug & Play control system
- > Panels with openings on both sides
- > Integrated electrical panel
- > Connection plugs
- > Warranty up to 5 years

ARFIT PRO Selection program tailored to the needs of each challenge

Flexibility and versatility start with the selection software. Through Arfit Pro, each unit is configured precisely and intuitively, adjusting parameters, specifications, and details to fully meet the requirements of every project.

Plug & Play Control System

The Plug & Play control system integrates the electrical panel directly into the unit, providing a complete and ready-to-use solution. Each system is designed with flexibility and customization in mind, ensuring it adapts to any project requirement. Equipped with quick-connect electrical plugs for easy connection between modules.

Be On. Be Smart – Stay two steps ahead Remote monitoring of installed equipment

The Be On. Be Smart solution integrates directly with Arfit equipment by installing a physical module – Be On – on the units, enabling the collection, transmission, and analysis of operational data in real time. Cloud connectivity is provided via Wi-Fi or Ethernet cable.

The Be Smart digital platform centralizes equipment information, allowing monitoring of operational status, access to performance reports, remote parameter configuration, and automatic maintenance alerts.

4 Technical Pillars:

- > Direct integration and flexible connectivity
- > Continuous monitoring with automatic alert notifications
- > Intelligent data analysis and periodic reporting
- > Centralized management with access control and remote parameter configuration
