DESCRIPTION

Air handling unit, PURE model, designed to adapt to all the requirements of an air conditioning and air treatment system, combining demanding technical specifications with the highest hygienic standards. Tested in independent laboratories in accordance with EN 1886 and EN 13053, VDI 6022-1 and DIN 1946-4, with EUROVENT certification and hygienic certification by TÜV NORD (PURE-H).

Highly robust structural frame with double-skin panels and thermally broken aluminium profiles. 50 mm thick double-skin panels insulated with 70 kg/m³ rock wool, achieving a high thermal performance class in accordance with EN 1886. Unique versatility, with fully removable panels featuring quick-release hinges, ensuring easy and fast access for installation and maintenance. The unit's height, length and depth can be adapted to suit the available plant room space.

Electrical control panel integrated within the unit, providing a truly integrated solution.

Available in two adaptable versions:
PURE H - Hygienic Air Handling Unit
PURE P - Air Handling Unit

STANDARDS AND CERTIFICATIONS

ADVANTAGES

- Unit adaptable to the available space.
- Corrosion class C5.
- Flexibility and versatility.
- Plug & Play control system.
- Integrated electrical control panel.
- Warranty of up to 5 years.
- Option to integrate the Be On module with direct cloud connection and Be Smart monitoring.

ACCESSORIES

- M5 filter, ePM10 50%
- F7 filter, ePM1 50%
- F9 filter, ePM1 80%
- Differential air pressure switch
- Constant airflow
- CO₂ control
